

THÖNI WILDFIRE

Self-wetting hose with excellent ember and flame resistance
especially for forest and vegetation firefighting.
Fluorescent signal colors for best visibility on the ground and from the air.

STRUCTURE

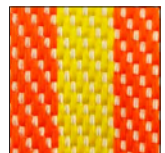

- optimized positioning of perforations
- high tenacity multifilament polyester yarn, circular woven
- ageing and ozone resistant EPDM rubber-lining
- exceptionally good adhesion values thanks to special vulcanizing process

ADVANTAGES

- impressively fast wetting (in seconds) even at low working pressure
- minimal water loss of max. 50 ml/min/m (working pressure)
- high intrinsic protection function and low flammability thanks to sophisticated perforation pattern
- ultra-light – one of the lightest hoses in its class (only 1.95 kg at 15 m)
- excellent visibility in the field due to spun dyed neon colored yarn and contrast weave
- highly elastic, abrasion-resistant and easy to clean
